Reference: M/700 Firing Pin Head - Operation 11
(Two (2) - Dumore Head Replacements) - Dept. 60

The machine in question is currently grouped with the M-700 Bolt Assembly Jewel Finish Group. Based upon current production levels and the inability to provide an adequate alternative, it is advised that we proceed with the purchase of these Heads as soon as possible. Immediate replacement would help insure us that there would be minimal or no downtime as the result of a possible major repair in the near future.
