SUBJECT: MODEL 700 in 17 Rem. Caliber

Marketing has requested that we investigate the addition of the 17 Rem. Caliber to the M700 Classic as soon as is possible in 1981. The barrel should be made from Ordnance steel.

Process is presently making a lot of barrels for Research to endurance test. We will plan on completing our testing approximately a month after receipt of the rifles.

We would appreciate costs, 1981 product acceptance date and warehouse date for this product.
