

Stock/Exterior Components

This is Winchester's standard Model 70 and is made of American walnut with cut checkering on the pistol grip and forearm. (Photo #12) The stock also has a Monte Carlo comb and cheek piece, a black plastic butt plate secured by two screws, a black plastic grip cap with a glued on designed insert in the middle, and two detachable sling swivels.

The stock has a single reinforcement stud ahead of the trigger inletting with caps on either end. (Photo #12)

The stock inletting is machined. (Photo #13)
