Revision I

M/700 Magazine Follower - Purchased Part vs. Make

This is Revision I of an economic evaluation on the M/700 Magazine Follower. This evaluation shows a change in raw material (using C-1112 steel) and also an 8% decrease in tool replacement and cutter grind.

This revised evaluation indicates a 38.9% ROI for 1983 and a 69.5% ROI for year 1985 with a capital investment of \$318,000 plus \$46,000 operation charges.
