"CONFINE YOUR LETTER TO ONE SUBJECT ONLY" \_\_\_\_\_

July 13, 1982

TO: R. L. SASSONE  
FROM: R. S. MURPHY 254  
SUBJECT: M/788 SAFETY DETENT SYSTEM

The new M/788 safety lever, safety detent plunger, and safety detent spring were designed to replace the current parts in an effort to increase safety "off" forces. These three parts interact to form a system where each plays an important role. Therefore, they should not be separated and interchanged with the current production parts. The function of the new safety system is identical to that of the current safety.

With respect to the repair of rifles already in the field, the new safety system can be used providing that it is installed in its entirety. This should eliminate the need to keep a supply of the current parts on hand.

	<u>Old Part No.</u>	<u>New Part No.</u>
Safety Lever	14035	13913
Detent Spring	14498	92058
Detent Plunger	14497	92057
