REPORT TITLE: M/700 ADL NO-BIND STAMPED FOLLOWER - LONG ACTION

ABSTRACT

On August 31, 1982, a request was received from P. Nasypany to field test various caliber rifles using the ADL No-Bind Stamped Followers - Design No. 5. The rifles were live fire-tested at the Ilion Fish and Game Club 100 yd. range using Remington, Federal and Winchester Ammunition of various bullet weights and feed rates.

SCOPE OF TEST

To evaluate the latest vendor samples of the M-700 No-Bind Stamped Long Action Followers - Design No. 5 for follower related malfunctions.

TEST RESULTS

Of the four calibers tested, only one malfunction occurred in 2640 total rounds fired in this test. The malfunction was a Stern Chamber Right and it occurred on a 30-06 caliber rifle. The total malfunction rate for this test was 0.03%.
