TO: J.P. LINDEFROM: G.D. CAMPBELL *GC*BOLT ACTION CARBINE STOCK

On January 20, plans to purchase a Hein NC Router for the Bolt Action Carbine Stock were reviewed with H.K. Boyle. The review resulted in a decision to:

1. Submit the Bolt Action Carbine Project without the Hein Machine. The BAC Stock will be started up using an alternate process.
2. Submit a separate project simultaneously to cover the cost of a two-spindle Hein NC Router for use in processing Long Stocks for the BAC, M/700, M/788, etc. A high-spot estimate indicates substantial savings will result.
