Mr. Leslie Bowman  
P.O. Box 88  
Ocate, NM 87734

Dear Les:

Clark asked us to send you the information requested in your letter to him on November 24, 1982. We have not answered sooner as we have been working on getting a Model 700 Barrel with a 7mm-08 Chamber.

We now have the Barrel and will be sending it to you under separate cover. It has been chambered in our Custom Shop to final chamber dimensions. You should be able to draw it up tight and have the correct head space. This can be checked and corrected by you or a gunsmith. It can then be proofed.

Answers to your other questions are:

- o The Model Seven Lwt. in 7mm-08 Caliber has a 9 1/4" with twist.
- o Dick Dietz has sent you a Model Seven which you should have received by now. SN 7600100.
- o The Model 700 Classic in 300 H&H Mag. has a 24 inch Barrel length.

We have enclosed some information on the Model Seven Lwt. rifle that you may find useful.

Yours truly,

*John W Brooks*
