

# RUGER M77 MARK II

*The perfect hunting rifle*

The Mark II is an evolutionary design based on Ruger's experience making millions of sporting rifles. Available in American walnut stock and All-Weather stock versions, as well as left-handed and target configurations, the Mark II is a handsome utilitarian rifle. By reducing the magazine capacity from five cartridges to four, Ruger has slenderized these ruggedly proportioned rifles.

Ruger offers two new M77 Mark IIs this year: a full-stock model with a blued barrel (Catalog No. M77RSIMKII); and a stainless-steel, Zytel stock model with sights (Catalog No. KM77RSPMKII). See chart on page 2.

Among its many desirable features, the Ruger M77 Mark II has a readily accessible three-position safety that allows both locking of the bolt and the ability to unload the rifle with the safety on. The trigger guard houses a patented floorplate latch that securely holds the floorplate and prevents accidental dumping of cartridges.

The stainless-steel Mark II bolt retains the non-rotating Mauser-type extractor. The fixed blade-type ejector positively ejects the empty cases as the bolt is moved rearward. Crisp positive ejection, handsome design, and famous Ruger strength have made the Mark II a classic.

## Target Rifle

The M77MKII Target Rifle is a true out-of-the-box precision rifle incorporating the most desirable custom features with fine Ruger craftsmanship and value. The Target model features

Ruger adjustable two-stage trigger. The two-stage trigger provides the reliability and added accuracy needed for precision shooting.

The heart of the Target rifle is the time-and-field proven M77 Mark II stainless-steel action.

Mated to the action is a heavyweight, 26-inch, free-floating, stainless-steel barrel with a special matte finish. Ruger hammer forges this barrel for the ultimate in precision. Although expensive, hammer forging pays off in unexcelled barrel accuracy.

Ruger chose resin-filled laminated wood for the stock. This provides an action bedding that is dimensionally stable in all weather conditions without sacrificing the natural beauty of wood. The forend is a flat beavertail target design that delivers a rock solid rest under the wide variety of conditions found in target shooting.

## Specifications

Each M77 Mark II model is equipped with an Integral Base Receiver and Ruger 1" steel scope rings. Magazine capacity: 4 rounds (3 rounds in Magnum calibers). Three-position safety. Nonrotating Mauser-type extractor. Fixed ejector. See chart on page 2 for calibers and barrel lengths.
