Gerald,
I have sent you a couple of Model 770/710 trigger assemblies that Jim Ronkainen brought back from his last trip to Ilion. Apparently the engagement screw moved on these and they were sent in to Arms Services. He commented that they are seeing a spike in returns for this particular problem. The only information I have on them is what you see below. These assemblies should get to you by Tuesday or Wednesday.

I could get only 1 serial number: 7153595, produced 2/7/07.

Tom,
I gave the two trigger assemblies to Vince Norton to review – he will forward what he finds on to Mayfield. Would it be possible to track down the serial numbers for the two guns the trigger assemblies came from? That would allow us to determine the production dates.

Thanks,
Jim Ronkainen
