Gary also requested the rev. E label be placed next to the dimensions that were added. Evidently a question came up about it.

Derek/Vince,

The rev G and F is not dated. What is date of revision??

Gary

Here is an updated drawing showing the change to the profile tolerance on the finger rest and update on the .067 dimension. Both changes were in response to our action list.

I'm not sure what happened there. I have fixed it.
Thanks,

Vince, the .067 dimension is still +/- .005. This was same as before.

Derek,
I have changed the print for the Model 770 trigger blank per our conversation yesterday. Please review this print and if it is OK with you then forward on to the appropriate personnel.
