Attachments: EXP10179 Trigger Blank REV D.PDF; EXP10262 Trigger.PDF

Attached are new prints for the Model 770 fire control with trigger block. The new print for the trigger shows the grinding operation that must take place on the trigger after molding. This should not effect the quote for the trigger blank that you have done. This is an operation that needs to take place at the plant after heat treat and color. Call me if you have any questions.
