Dear Sirs:

I am sending you this rifle in reference to the CBS TV 6 minutes program which aired on March 20, 1994 in regard to several guns which had a tendency to misfire. One of the guns in question was the Remington 700 rifle.

I wrote a letter to your company in Wilmington Delaware. That letter was evidently forwarded to your company in ILION, N.Y., because I received a telephone call from N.Y. requesting that I send you this rifle for an inspection about the misfiring of said rifle.

This rifle misfired on me years ago after 2 day of deer hunting. I was in the process of unloading the rifle outside of our cabin when it misfired.

The bolt cannot be moved unless the safety is off. The misfire could have happened when I threw the safety off. Anyhow it misfired precisely when I started to unload the rifle, either by taking off the safety or by moving the bolt.

Charles Austin
