

Task: Conduct warehouse audit of Model 700 and Model Seven rifles with X-Mark Pro (XMP) trigger assemblies to check trigger pull force
Sample Size: 50 piece sample pulled from warehouse inventory. One sample had old style trigger assembly even though box was marked for XMP.
Measure trigger pull out directly out of the shipping box using 3 different methods. The first method used was the production spring scale moved by hand. The second method was a Lyman digital force gage moved by hand. The third method was to remove the action from the stock and
Test Method: measure trigger pull with the Dvorak Triggerscan with the action held in a fixture.
