I checked back and they received the prints on May 14. Two months seems like a long time to quote. Especially since all of the parts are essentially what they are receiving now except for the trigger block. I would think we need numbers and a decision made before mid August.

Will,

We have sent the prints out for vendor parts quote. We have requested quotes by 7/9/07. I am out of the office from 7/12-7/27. I would expect costing to be in mid August.

Thanks,
Danny Chamblee

The Engineering Evaluation Testing (EET) has been completed for the "New" M770 Fire Control (trigger block) with positive results. Where do we stand with the production estimate for this change? Please confirm a date that the production cost estimate will be complete. The last date we had was June 14th.

Thanks,

Will
