Gentlemen,

I have attached the X-Mark Pro trigger pull study done on finished guns from OHL.

The main item of interest was the average difference in trigger pull force on the same guns between the spring scale and the Dvorak.

We will meet to discuss.

Steve P.

Steve,

Per our conference call last week we were going to forward you Jim Snedeker's data summary once E-mail was functional again. Please distribute to others in Ilion as needed. Call if you have any questions.
