

MAY 24, 1980

Dear Sirs,

Enclosed you will find two 600 Mahank rifles which have gone off as the bolt is locked forward.

We understand you have had problems with this model and that you put on a different trigger assembly.

The one went off in my house, ruined the barrel of another gun for ever, which caused metal pieces to fly around the room. One person was injured. It could have been a very fatal case.

Thank you,

Bob Bangs
