

Model 700™ USR - Urban Sniper Rifle

Remington Military Products Division is pleased to announce the development of the Lightweight easily maneuverable **Urban Sniper Rifle (USR)**. A Must for operating in any urban environment, or long overland movements where weight is an issue.

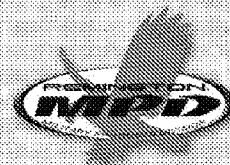

The Model 700™ USR features a fluted 20" barrel and is 5.6 pounds lighter than the M24A2, Twist rates are 1 in 12" in our popular .308 Win. And 1 in 10" in the hard hitting .300 Rem. SA Ultra Mag. The USR comes equipped with a detachable **10 round box magazine** in .308 win, and 7 rounds in 300 SAUM.

The Model 700 USR incorporates the **Modular Accessory Rail System (MARS)** which allows the use of stand alone clip on night vision systems. Additionally the MARS allows the use of IR and white light illuminators on either side of the rifle.

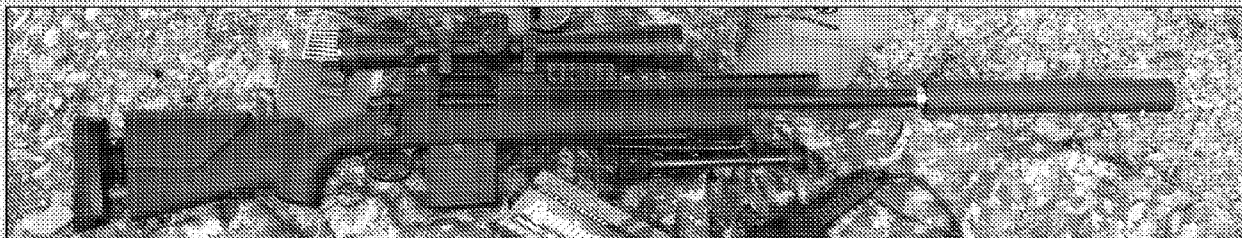

The Model 700 USR also features a removable sound suppressor that reduces signature by almost 85% thus providing the sniper with location deniability in all environments. The suppressor requires minimal maintenance and cannot be disassembled

Model	Caliber	Barrel Length	Twist	Mag Capacity	Order No.
700 USR (Complete System)	.308 Win	20"	12"	10	86450
700 USR (Rifle Only)	.308 Win	20"	12"	10	27419
