Dear Mr. Grattias,

Thank you for your patience. We regret that you are experiencing problems with your firearm. Based on the information you have provided, we suggest that you send your firearm to our Ilion, NY facility.

You can print the factory repair form and instructions at the following section of our site.

[http://www.remington.com/support/repair\\_services/factory\\_repair\\_form.asp](http://www.remington.com/support/repair_services/factory_repair_form.asp)

Or follow these guidelines if in the US:

1. Record the serial number of your firearm before sending it to us.
2. Pack your firearm for safety and to prevent further damage in shipping and handling. Preferably, ship in a firearm box, not a hardcase.
3. Remove all accessories from your firearm to prevent loss or damage. This would include scope, slings, or extra choke tubes.
4. Enclose a letter with the firearm detailing the model name or number of your firearm and serial number along with a full description of the problem. Be sure to include your full name and address (P.O. Box and Street Address), including zip code, daytime telephone number, and e-mail address.
5. Ship your firearm by either United Parcel Service (UPS) or Parcel Post (US Post Office). Remington is not responsible for damage or loss during shipment, so you may elect to purchase insurance from your carrier. Customer is responsible for shipping charges to the factory.

For U.S. repairs only, ship to:

Remington Arms Company, Inc.  
Attn: Arms Services Division/Repairs  
14 Hoefler Avenue  
Ilion, NY 13357

WARNING: DO NOT SEND LIVE OR SPENT SHELLS IN YOUR FIREARM OR IN THE SAME BOX WITH THE FIREARM. THIS IS A VIOLATION OF FEDERAL LAW. IF YOU FEEL YOU MUST SEND SPENT SHELLS PLEASE SEND THEM IN A SEPARATE PACKAGE AND INCLUDE NAME, ADDRESS (WITH ZIP CODE), TELEPHONE AND MODEL AND SERIAL NUMBER OF YOUR FIREARM.

If you have any questions as to the warranty on Remington firearms, please refer to the following section of our site.

I am experienced hunter and gun user and have been hunting for many years. I have a Remington Model 700 30X6, serial #A6343170. The gun was loaded and on safety. As I was taking the safety off, it was very stiff. When the gun went off safety, the gun fired. My finger was no where near the trigger. I have heard this was a problem with this model in the past and wondered if Remington would take care of this issue. What do I need to do to get this fixed? Thanks for your help.
