Customer (Angele Robertson) 9/24/2006 12:56:29 PM

Help! I just got a youth model 700 in August and have fired it about 40 times. The serial # is G6500267. Twice it has fired simply by my moving the safety to the fire position yet my fingers have been nowhere near the trigger! This is dangerous. The two times it happened have been at least 15 firings apart. The trigger is not necessarily ultra sensitive, you actually have to squeeze it to fire....except the two times it fired basically on its own. There must be a malfunction somewhere, maybe the bolt? Whatever, I am no longer comfortable shooting it and want to go hunting soon! Can you help me out?

Thank you

Angele Robertson
