Dear Brent,

Thanks for contacting Remington Country. You need to get this gun to a RARC for as inspection to see why the discharge.

Customer (Brent Bryson) 10/22/2007 3:32:07 PM

I purchased a remington model 710/243 win last christmas for my son, we were sighting in our guns for the upcoming deer season and when he went to unload the remaining 2 shells in his gun, he raised the handle of the deadbolt and the gun discharged. scared us very badly. i got online and saw there was a recall and put in the serial # but said it was not part of recall. any suggestions on what to look for.
