David,

Thank you for contacting Remington Country! We appreciate your interest and support in our Remington products. You would need to have your gun checked by an authorized repair center. Below is the link for the repair centers in Canada.

i bought a model 710 #71274355 last fall and while in my tree stand today i heard a deer coming through the trail.the gun was on my and not wanting to scare him off with the loud snap of the safety i eased the safety ahead with out my hand near the trigger.as soon as i moved the safety the gun fired-this is a very dangerous thing to happen-the gun has had light use and has shot deer before.i would like a response from your company before i take this gun to a gunsmith with no shells in the gun it fired again with out any movement of the trigger by me this is a serious problem please respond
