Travis,

Thank you for your email.

This rifle is probably included in our safety modification program. I have attached a link below to more information on this.

Customer (Travis Mills) 5/8/2008 5:58:31 AM

Dear Remington,

I have just inherited my fathers model 700 308 caliber rifle after his passing and I remember him telling me that the weapon had fired by itself a few times, is there a problem with the trigger mechanism and if so how do I fix it.

Thankyou Travis Mills
