Dear Glen,

Thank you for visiting Remington Country! We certainly appreciate you taking the time to write in with your question. If your gun was made before 1982 you gun would be in the safety modification program. Contact us at 1-800-243-9700 with your serial number and we will tell you.

I have an older model Remington 700. It has on several occasions fired when the safety is pushed off. I know that this can be fixed but I am wondering what is the best way to deal with this problem? Thank you Glen McNitt
