Remington® Model 700™ Rifles Take Short Action Ultra Mag Performance to the Next Level

Madison, NC – Remington is proud to introduce the first short action Model 700 magnum rifles - the **Model 700 BDL™ SS** and **Model 700 Sendero® SF** in .300 Remington Short Action Ultra Mag and 7mm Remington Short Action Ultra Mag. Introduced in 2001, these highly efficient cartridges bring true magnum power to the short action platform. Now Remington is matching the strength and accuracy of the Model 700 design with our Premier® Short Action Ultra Mag offerings.

The **Model 700 BDL SS** (Stainless Synthetic) offers all of the reliable design features of the Model 700 BDL housed in a rugged, all weather black synthetic stock complete with swivel studs. The short action receiver and clean 24-inch magnum contour barrel are constructed of 416 stainless steel with a satin finish. The hinged floor plate magazine has a 3 + 1 round capacity and the receiver is drilled and tapped for scope mounts. Suggested retail: \$775.

At the top of the class of premier long range, short action magnum rifles is the **Model 700 Sendero SF** (Stainless Fluted). Features include a 416 stainless action, bedded in a hand laid-up composite stock reinforced with aramid fiber, swivel studs and a 26-inch free-floated, 416 stainless steel barrel with longitudinal fluting for added rigidity and heat dissipation. The hinged floor plate magazine has a 3 + 1 round capacity and the receiver is drilled and tapped for scope mounts. Suggested retail: \$1016.

Pairing the revolutionary performance of the .300 Remington Short Action Ultra Mag and 7mm Remington Short Action Ultra Mag cartridges with the time-proven, out-of-the-box accuracy of the Model 700 will set a new standard for magnum rifles.
