Remington Model 700 LSS Limited Edition 50th Anniversary of the .280 Remington—A Classic Rifle Honors a Classic Cartridge.

Madison, N.C. – The .280 Remington has long been a preferred caliber for knowledgeable big-game hunters since its introduction 50 years ago. It offers efficient down-range performance with moderate recoil—a true rifleman’s cartridge. The new Remington Model 700 LSS Limited Edition rifle has classy embellishments that celebrate this wonderful cartridge.

At the core of this rifle is the rigid Model 700 receiver, machined from a solid steel bar. This, combined with the famous “three-rings-of-steel” design which completely supports the cartridge, makes the Model 700 one of the strongest and most accurate actions available. With this solid construction and advanced design, the Model 700 has earned a reputation for its out-of-the-box accuracy.

The action is set in a gorgeous, glossy black laminate stock that is impervious to moisture and fit with the revolutionary R3 Recoil Pad. The new X-Mark Pro fire control system is standard and delivers crisp, perfect trigger pulls and is set at 3.5 to 5 pounds at the factory. A satin-finished ** stainless steel action with jeweled bolt is paired with a 24-inch, clean stainless steel barrel to complete this handsome rifle.

The magazine has a four round capacity and features a specially engraved floorplate. A .280 cartridge is surrounded by tight scroll and the 50th anniversary dates are laser engraved below the cartridge. The rifle retails for \$639.
