**Remington Introduces New Military Rifle Chambered in 7.62 NATO
Rem – the Model M24A2**

Madison, NC - Remington Military Products Division continues to work diligently to provide our nation's military forces with highly effective firearms tools for use in the defense of our nation. New for 2005 is the **Model M24A2 Sniper Weapons System** – an enhanced version of the widely used Model M24 Sniper Weapons System which has been the standard for the US Army since 1988.

Features of the newly introduced **Model M24A2 Sniper Weapons System** include a detachable 10-round box magazine, H&S Precision Pro-2000 stock assembly that features adjustable length of pull (LOP) and an adjustable cheek rest, the Modular Accessory Rail System, a Leupold 3.5-10X M3LR, and an OPS Inc 3rd Model M24 Suppressor.

The **Model M24A2 Sniper Weapons System** is based upon the combat proven M24 Sniper Weapons system in use today by the US Army in the Global War On Terrorism (GWOT) and is widely considered as the standard by which other sniper rifles are judged.

Remington offers you the option of purchasing a complete **Model M24A2 Sniper Weapons System** or upgrading your existing M24 Sniper Weapon System completely or in part. Much of the M24A2 can be ordered directly from Remington and installed by the operators. The **Model M24A2 Sniper Weapons System** will continue to offer surgical precision and reliability to those who demand the best.
