Hello,

Ref: Remington 700 Classic 300 H&H Ser B6463236
Purchased new 6/7/83

During the past three hunting seasons, on four seperate occasions I have removed this rifle from my shoulder only to find the action open and a shell on the ground somewhere. So far, no dirt or tree branches have been found in the "open" action, but I do worry about that.

QUESTION: Can this rifle be modified to lock the action while loaded and on safe?

Thanks

Earl Batchelor
