

MODEL 760 - 280 REMINGTON

At the last meeting, the Operations Committee endorsed a recommendation from Sales for introduction of this model. Since this item appeared in the Development Schedule for Management approval, no further action was taken by the Operations Committee. It now is noted, however, that the Research and Development phase is completed and that the next step involves tooling by the plant for production. The Operations Committee will therefore submit a formal recommendation to Management for introduction of this model.

RIM FIRE RIFLESMODEL 552 GALLERY SPECIAL

The introduction of the Model 552 GS having been approved by Management, the Ilion plant has completed production of the first lot of guns and 107 have been delivered to the warehouse. The Sales Department is obtaining orders for these guns in selected locations on the Eastern seaboard where these can be carefully watched. No further action will be taken until the Sales Department reports on the acceptance of this first group of guns.

MODEL 555

All metal parts except one small new one have now been received and it is expected that the first lot of 200 guns will be completed as scheduled in December. It is expected first guns will be available November 17. A group of five guns has been put up for design tests and so far they have been fired approximately 96,500 rounds. The results to date are as follows:

Model 555 Design Test
October 22, 1957

<u>Gun Number</u>	<u>Number of Rounds</u>	<u>% Malfunctions</u>
1	25,000	.55
2	25,000	.40
3	21,500	.60
4	15,000	.10
5	10,000	.35
	96,500	.43
