RIM FIRE RIFLES

MODEL 552

The Sales Department is carrying on what is probably the most extensive field test ever undertaken by this Company involving 126 guns. It is estimated that 150 shooters will participate and will shoot over 200,000 rounds of ammunition. Wayne E. Leek reported that results representing 54% of the guns have been received and that the trend of the results suggests the conclusions will probably not differ much when all of the results have been analyzed.*

* F. E. Morgan stated that about 18 additional reports have been received and that they follow the trend of the reports analyzed by W. E. Leek.
