

Arms Division Minute 4, 1958

R-7 Single Shot Folding Stock Gun - XR-1

The Sales Department has estimated that 1,000 guns could be sold at a list price of \$29.95. Since it is quite apparent that this forecast is insufficient to support the development and tooling, consideration of this item will be deferred.

R-8 Slide Action Box Magazine Version of the Model 572 - XR-5

Like Item R-5, this will be deferred for later consideration.

R-9 "Do-It-Yourself" Kit

The Sales Department does not believe this item should be considered at this time.

Shotguns

S-1 Light Colored Stocks and Fore-ends - Models 870 and Sportsman-58

The Sales Department has estimated that based on the \$10.00 increase in list price, their forecast would be as follows:

Model 870	800 guns per year
Sportsman-58	1200 guns per year

In each case, this is additional volume above present forecasts. Only this additional volume of guns would be produced with the light wood.

The Sales Department has been requested to prepare a forecast based on the provision of maple stocks on all guns in these models with no increase in list price. In the meantime, Ilion Methods and Standards will start on the preparation of costs based on the above forecasts.
