

A sample gun has been fired approximately 25,000 rounds in design testing with good results.

This model shows promise as a potential replacement for the Model 514 at a lower cost and also possibilities as a gun tailored to the Canadian market.

General Review

Attached is a summary report of the Master Development List prepared by the Chairman of the Firearms Survey Sub-Committee. This report proposes that the Sub-Committee be disbanded and items disposed of as outlined. Pending items and those in development would be picked up on the regular agenda and Development Schedule and be handled by the Operations Committee. 83

The Committee concurred with the Sub-Committee Chairman's recommendations with the reservation that the Secretary prepare a permanent Master Development List to provide a history and running record of items suggested and their disposition.

Meeting adjourned - 11:30 A.M.
