

XC-6 (AUTOLOADER)

The status of this development parallels that of the XS-6 shotgun, described in these minutes.

Research & Development reports that the XC-6 rifle will meet or exceed the current Model 721 in structural strength.

The design is such that the basic 30-06 caliber model can be modified to handle Magnum calibers, with some increase in action size and bulk, if the Sales Department desires Magnum models.

Research & Development expects an XC-6 appearance model from the model shop by July 1, 1959. Drawings of the XC-6 will be shown in a Bridgeport meeting with the Sales Department scheduled for the first week in June.

(Subsequent to the meeting, it was determined that the Bridgeport meeting would be held on June 4, 1959.)

RIM FIRE RIFLES

NYLON 66

The Plant reports revision of the warehouse schedule for this item as follows -

May 5, 1959 Schedule

	<u>Mohawk Brown</u>	<u>Seneca Green</u>
February 1959	858 Actual	96 Actual
March	2,010	1,127
April	3,892	1,100
May	4,000	2,000
June	4,400	2,200

The Sales Department desires to be informed promptly of all cases of breakage of Nylon 66's in the field, and requests that the Plant transmit information on all breakage cases, including particularly those breakages not reflected in complaint reports. The Plant agrees.

The Committee agrees that this item be dropped from the agenda.
