

ILION DIVISION

Action was taken as follows regarding suggestions for new products submitted by employees -

Item: Powder-Actuated Nailer

Employee: P.H.H. Noerager

Action: Rejected. Idea has been submitted and considered on previous occasions. The economics of powder-actuated devices and expendable cartridges make such tools impractical for driving nails in wood where hand tools suffice.

Item: Epoxy Resin Glue for Affixing Studs

Employee: J. J. Dreyfors

Action: Rejected. Could have merit. Of questionable value to Remington as a business venture in view of present Stud Driver business. To be kept in mind for possible future development.
