

XS-6 SHOTGUN - Continued

Action: Improved Gas Operating
 Weight: Approx. 6-3/4 pounds (with 28" barrel)
 Overall Length: 47-3/8"
 Interchangeable Barrels
 Stock: Molded Nylon
 Drop at Heel: 2 1/2"
 Drop at Comb: 1.625"
 Length of Pull: 14"
 Fore End: New design for simplified takedown and eliminating magazine cap.
 Checkering with finger grooves, semi-beavertail shape, etc.
 Receiver Sizes: 12 & 16 Ga. -- same as present M/870 and Spts.-58 for width, and 9/10" shorter.
 20 Ga. -- to be smaller if additional cost not prohibitive to accommodate this difference (design details remain to be worked out).

Model making has already been started, with completion of first experimental model expected by January of 1960, and scheduled priority being given to the new center fire rifle.

SHOTGUNS WITH RIFLE SIGHTS

(RRS Models of Sportsman 58, 11-48, and 870)

All orders for shotguns with rifle sights, and all orders for spare barrels with rifle sights, have been shipped.

The revised warehouse schedule is as follows:

	May 5, 1959			July 7, 1959		
	Schedule			Schedule		
	M870, Sp. 58, M11-48			M870, Sp. 58, M11-48		
May	200	150	100	124	118	0
June	(as required by Sales)			211	25	89
July				(as required by Sales)		

All figures shown are actual warehouse production.

The Plant states that it is prepared to produce these items up to the amount forecast by Sales.

The Committee agrees that these items should be dropped from the agenda.
