GENERAL

SCHEDULING OF MEETINGS

The Committee re-scheduled the August 7 meeting to August 21 to avoid conflict with the Ilion Plant shut-down. The September 4 meeting was re-scheduled to September 11.

CUSTOM CHECKERING

The Production Department reported that the economics of extending Custom Checkering to existing models are being determined, and will be completed the week of July 16. They will be used to prepare a Part III to the Custom Checkering project which is now fully expended.

The models to which it is proposed to extend custom checkering are indicated in the table below. In addition to the A grade models on which the Custom Checkering project was originally based, the list now includes all models presently machine checkered.

	<u>PRESENT</u>		<u>PROPOSED</u>	
	<u>Checked</u> <u>(Machine Cut)</u>	<u>Roll Mark</u> <u>Receiver</u>	<u>Checked</u> <u>(Custom)</u>	<u>Roll Mark</u> <u>Receiver</u>
