

Committee Action

The Committee recommends General Management approve the Model 40X-B to be introduced in January, 1964.

GENERAL

1964 FIREARMS LINE

The Committee reviewed the items shown in Table 1 attached that are scheduled to be introduced in 1964 or earlier. This is an inclusive list and no other items are known at this time. There is currently no definite plan to extend RK-W to other arms than those now approved; the Model 1100, Model 700 BDL, Model 870 SA, and 870 TB. Extension of RK-W is now limited by capacity, high cost, possible alternative finishing techniques by a molded stock process, and limited field exposure. The decision to extend RK-W will be made when these have been resolved.

SEMI-ANNUAL FIREARMS DEVELOPMENT SCHEDULE

The Committee approved the Semi-Annual Firearms Development Schedule. It will be issued as an Informative Bulletin.

Meeting adjourned 11:45 a.m.
