

FIREARMSSHOTGUNSMODEL 1100 AUTOLOADING SHOTGUNMahogany Stock & Fore End - 20 Gauge

Delivery of mahogany plank is promised the first part of May. Assembly of approximately fifteen hundred (1500) 20 gauge shotguns should start in July.

28-410 Gauge Conversion

A security agreement has been signed by Simmons. At a meeting in Ilion March 30, 1965, a tentative program was established. Attached as Table 1 is a copy of the memorandum of the conference with Mr. Ernest P. Simmons - Simmons Gun Specialties.

The committee reconfirmed the program. It is indicated that through the combined program, the quality of 28 and 410 gauge conversion guns should be improved. Remington should benefit through increased shotgun and parts sales.

Deer Gun (Rifle Sight Barrel)

Tool design has been completed. Production to warehouse should start in July.

MODEL 11-48 AUTOLOADING SHOTGUN

Production of Model 11-48 shotguns having Fore Ends with finger grooves has started. The changeover will be made in 1965 without obsolescence.

Committee Action

This item will be dropped.
