

CENTER FIRE RIFLES - contd.MODEL 742-760 "BDL" GRADE - contd.

With the delay in announcement until January 1966, production is to be extended to other calibers. The original program provided for only the 30-06 caliber.

Committee Action

The general appearance of the sample rifles was considered satisfactory except for metal finishes. The Ilion plant is to investigate processes to improve the metal finish.

The Ilion plant is to schedule production so that an adequate quantity of rifles is in the warehouse to fill orders starting January 1, 1966.
