CENTER FIRE RIFLES - contd.

MODEL 700 "BDL" VARMINT GRADE - contd.

Committee Action

The Bridgeport and Ilion R & D programs should resolve the accuracy possible to attain in a varmint rifle using "Power-Lokt" ammunition. Additional model rifles should be produced in order to establish specifications.

-6-

A varmint rifle is required by Marketing to round out the line and economics indicate a satisfactory return.

The committee recommended the preparation of a project to purchase an additional chambering machine.

"BOL" GRADES MODEL 552-572

Two hundred (200) each Model 552 and 572 rim fire rifles are scheduled to be produced to the warehouse in November.

Deflectors for the Model 552 autoloading rifle were received November 10,

The production sample Model 552 and 572 "BDL" rifles were presented for Operations Committee approval.

Committee Action

After review and approval of the production sample rifles by the absent committee members, Management is to be requested to authorize invoice shipment.
