

ALMCO PROCESS VERSUS PROPOSED MODEL 1100 FINISH

Almco

Outside appearance  
Improved functioning - internal finish and burring  
Model 870 - Magazine Tube appearance  
Capacity to improve finish on Nylon 66 Receiver Cover

Intangible

Sales appeal  
Reduced customer complaints due to improved functioning  
Reduced plant gun repairs and testing costs

Potential

Reduced hand polish costs  
Improved flow of components by eliminating choke points  
Reduction in media costs over estimate  
Possible sale of used small media back to Almco  
Reduced repair costs for finish mars  
Reduced maintenance of equipment - fewer moving parts which should reduce Production down time

Tangible

If the Almco program is not accepted, the vendor will use experimental work as a basis to offer to competitors.  
Remington probably will be forced to the Almco or increased hand polishing costs in order to remain competitive.
