

SHOTGUNS - contd.Costs - contd.

Average third year costs were \$7.29 under the project forecast. Volume and low warranty repairs are the major contributing factors.

Committee Action

This item will be dropped.

Fore End

The plant has been in production for the past month on the addition of the four longitudinal slots at the rear of the Fore End to equalize stresses.

It will be several months before field reaction can be evaluated.

CBC - BREAK-ACTION SINGLE BARREL SHOTGUN, 12 GA.

An evaluation of the Canadian market is being made. Eighty-five (85) guns have been sold to Ontario dealers to retail at \$32.95. The other fifteen (15) are being held for spare parts.

Marketing plans to discuss the design, packaging and other items with CBC management. A decision on the sale of CBC produced shotguns in the United States can then be made.

CENTER FIRE RIFLESMODEL 600 BOLT ACTION RIFLECosts

Attached as Table 2 are the Model 600 cost comparisons with the project forecast. Since 1965 is the second year, comparisons are made with the project first year costs. For 1965, the average costs for the first six months, the last six months and the average for the total year are shown. The 1965 average is \$5.68 under the first year project forecast. Total plant volume is the major factor.
