

TELESOPES AND MOUNTS

Present design was reviewed with one respected gun writer. Two suggestions for improvement were made:

1. Move the rear mounting ring forward to be more compatible with the newer variable power scopes. This also will move the eyepiece forward.
2. Refine the adjustment for elevation.

High spot economics should be available for review at the March meeting.

The meeting adjourned at 10:40 a.m.

The next meeting is scheduled to be at Ilion March 10 at 8:30 a.m.
