

FIREARMSSHOTGUNSWOOD MOLDING - MODEL 870 STOCK

At the January meeting, R & D reported that the molding equipment would be assembled in March. Delays have been encountered. Full production line facilities are scheduled to be completed in June.

The plant has assigned a Richardson wood copy lathe for work by ERD to improve controllability of Stock geometry and finish. Designs are essentially complete and work started to fabricate parts for the conversion.

MODEL 1100 AUTOLOADING SHOTGUNFore End

Three longitudinal slots have been added at the rear of the Fore End to equalize stresses. Marketing reported that although Fore End breakage has not been eliminated, it is indicated the change has reduced the field problem.

CBC - SINGLE BARREL SHOTGUN, 12 GA.

The initial shipment of 12 gauge CBC single Barrel shotguns which were transferred to Canada have been sold. An order for an additional five hundred and fifty (550) guns has been placed. The quantities are:

| | |
|-----|---------|
| 350 | 12 Ga. |
| 50 | 20 Ga. |
| 150 | 410 Ga. |

It was reported that CIL has ordered ten thousand (10,000) shotguns from CBC. The pricing of the Remington guns as compared to CIL will have to be resolved.
