

RIM FIRE RIFLES - contd.RIM FIRE TARGET RIFLES

A prototype of a single shot commercial target rifle to replace the Models 521T and 513T was reviewed by the Committee. R & D has furnished the plant drawings for estimating.

In addition, a prototype of a military version magazine box target rifle was shown to the Committee. Drawings for estimating with an oil and lacquer finish on the wood have been furnished the plant for estimating. The proposed military version meets the present government specifications.

Committee Action:

The proposed target rifles were accepted.

TRAPSMODEL 100T & 200S TRAPS

R & D reported on the design program (Exhibit 6) for traps. The addition of the stellite to the carrier hub has been added to the "quick release" mechanism in Lordship traps and all traps and spare parts furnished by Ilion. The "quick release" feature will be incorporated in all new and repaired traps. Other items will be effected as soon as the design is completed.

Improvement in the 100T traps will depend on reducing the violence of the mechanical action. High speed motion pictures will be taken to assist in analyzing the problem.

EXPERT, BLUE ROCK & WONDER TRAPS

The transfer to Ilion of the Expert, Blue Rock and Wonder Traps has been completed. Traps have been assembled and shipped from Ilion.

Committee Action:

Since the transfer has been completed, this item will be dropped.
