

SHOTGUNS - contd.Fore End - contd.

Some additional equipment will be required to effect full production.

Committee Action:

Full production of 12 gauge Fore Ends with fiberglass reinforcement was authorized.

MODEL 1100 & 870 SHOTGUNS

R & D indicated that the Model 1100, 20-28-410, and Model 870, 28-410 gauge design and processing should permit production of mirror image left hand shotguns with minimum changes. The indicated parts that would require change were enumerated. R & D expects to have a prototype gun for review at the September meeting. 83

Marketing indicated that a left hand version could be priced \$10.00 to \$15.00 over the right hand selling price. Marketing will forecast the added sales that can be expected.

CENTER FIRE RIFLESSAFETY MARKING

The "S" and "F" marking equipment for the Model 660 should be completed in August. The Model 660 Receivers except the initial pilot quantity which have been completed will have the safety marking.

As soon as Model 700 model drawings are received from R & D, equipment to add the safety marking will be designed and fabricated.
