MINUTE #2 - 1968

RIM FIRE RIFLES - contd.

MODEL 540X & 541X RIM FIRE TARGET RIFLES

R & D indicated prototypes of the target rifle Stocks are considered satisfactory. Arrangements are to be made for Bridgeport personnel to review the proposed design at Ilion.

R & D has released all model drawings except for the Stocks and for the Model 540X, the adjustable Butt Pad parts. This delay can affect the schedule.

Design of gaging and fixturing for the N/C machine remains to be completed. On released components, orders have been placed for approximately 80% of the tooling. ...

TRAPS

MODEL 100T & 2005 TRAPS

(

ų. Marta

and the second second

Attached as Exhibit 5 is a progress report on traps after the takeover at Ilion. Samples of the brimetal lining material for the brake have been received and will be tested.

Six (6) of the nine (9) items covered in the seport are in effect. Marketing suggested that R & D recommend a modernization kit for the 100T and 2005 traps in the field. Consideration will be given to modernization of all term traps without cost to the customers

It is believed that when these improvements have been made along with some other minor items, Remington trap performance should equal competition.

TOURNAMENT TRAPS

A representative of the Bridgeport R & D reviewed the status of the proposed hand loaded auto-angling pneumatic Tournament Trap. Both the throwing and auto-angling mechanisms had been demonstrated to Marketing. The inherent difficulty of handling targets of different sizes was discussed in depth. The:
