## TRAPS

## MODEL 100T AND 2005 TRAPS

R & D has received sufficient new brake material to equip the Lordship and the Catamount Gun Club Traps. The conversion of the Lordship Traps will be made as soon as possible. The Traps will include all of the improvements developed to date.

Initial shipment of the new brake assembly is promised the latter part of June.

## TOURNAMENT TRAPS

Bridgeport R & D has been working with Marketing for the development of the hand-fed pneumatic Trap. Two mock-ups having an agreed upon side loading have been reviewed. R & D through control of the softness of the rubber can obtain the required 83 target spin. Also development indicates that more than adequate throwing distance can be achieved. Development work is continuing.
