MODELS 1100 and 870 - SMALL GAUGES - Possible Design Changes

With reference to letter on above subject, dated April 30, two changes are involved:

Locking Block - 410, 28 & 20 Gauges

Completely redesigned. It is planned to program this design for N/C 83 machines to supplement production so that our schedules can be met.

Action Bar Sleeve

Nothing accomplished on this one yet. On 2 1/2" versus 3" chamber it was decided to use a compromise chamber throughout. In other words, field and skeet guns will contain 3" chamber.
