

FIREARMSSHOTGUNSSHORT STOCK PRESS FORMING - MODEL 870

Production reported that additional equipment to increase the capacity of the press forming should be completed in January 1969. Approximately sixty-five hundred (6500) press formed Stocks have been produced to date and are being used in regular gun assembly.

MODEL 870 SHELL LATCH - MODEL 1100 FEED LATCH

The revisions to the Model 870 Shell Latch and Model 1100 Feed Latch to eliminate the occasional problem of shells feeding back of the Carrier should be effected in gun assembly as follows:

Model 870	12 Ga.	September	1968
	16 Ga.	July	1969
	20 Ga.	February	1969
Model 1100	12 Ga.	December	1968
	16 Ga.	late	1969
	20 Ga.	January	1969

MODEL 870 20 GAUGE "BRUSHMASTER"
MODEL 1100 DEER GUN

The economics to add the 20 gauge Model 870 "Brushmaster" and Model 1100 Deer Gun are attached as Exhibit 1. Pilot guns should be produced in December 1968 for 1969 announcement.

The calculation does not include the sale of spare Barrels which will increase the earnings.

Committee Action:

The Operations Committee approved the addition of the 20 gauge guns and recommends General Management authorize release to production.
